

CaBano

#30108D

Widespread basin faucet

INSTALLATION GUIDE

Last revision: October 23rd

III. Installation Diagram

IV. Installation Steps (Fig.1-9) : * The installation diagram is only for reference. The product is subject to the real object.

1

Prepare and check the following tools.

Spanner

Philips Screwdriver

S2.5 Wrench (supplied)

S2 Wrench (supplied)

2

Loosen the M5 screw first. Take off from the inlet valve bodies the following one by one: handle, M4 screw, handle core, hex nut, plastic spacer and decorating ring. Screw off the locking nuts to the bottom.

Handle

M4 Screw

Handle Core

Hex Nut

Plastic Spacer

Decorating Ring

Inlet Valve Body

Rubber Washer

Locking Washer

Locking Nut

M5 Screw

3

Place the two inlet valve bodies (red on the left and blue on the right) upward through the basin deck with the outlet holes facing against each other. Tighten on the plastic spacer (red for the left and blue for the right) and then tighten the hex nuts. Install back the handle core and tighten M4 screws.

I. Installation Notice

1. Please lay water pipes in accordance with this manual.
2. Floor drain should be installed on the site.
3. The product should be installed only after the completion of house interior decoration in case the paint or other chemicals erode the mixer surface.
4. Clean pipes to get rid of mud, sand or other debris blocked in pipes before installation.
5. Check whether the threads can be matched. Otherwise, installing forcefully will damage the components.
6. After installation, check all the joints to make sure they are firmly connected. Run the water. Turn on and off repeatedly to ensure no leaking problem. After that, the product is ready for normal use.
7. Hand the manual to users.

II. Operation Notice

1. The product is used under water pressure 0.05~1.0 MPa, water temperature 4~90°C.
2. Do not hang heavy things on the product.
3. Remember to turn off the mixer if no water comes out of it (Especially when nobody in the house or during the decoration period).
4. Clean the surface of the product regularly to keep it glossy. Note: Please do not use inappropriate tools such as sharp brushes, rough sponges, scouring pads or corrosive detergent. And it is not recommend to use the detergent sold in the market, because its formula changes frequently. Please clean the product with wet cloth and soapy water after usage. Then rinse the soap off with clean water and dry with a soft cotton cloth.
5. When indoor temperature drops below 0°C, take necessary measures (Keep the product warm, close windows) to prevent the product from frost cracking (Especially when windows open for air ventilation while nobody in the house).
6. When in use, open cold water first, then hot water; adjust the appropriate temperature before use to avoid scald.
7. Do not disassemble the product without help from the professionals.

4

Take off the following from the faucet body accordingly: the protection sheath, diamond-shaped nut, locking washer, rubber washer and deco rings.

8

Take off the locking nut and setscrew from the inlet valve bodies and install the handles back. Tighten M5 screw.

5

Put the decorating ring onto the faucet body and then place the faucet body downward through the basin deck. Then put on the rubber washer and locking washer, tightened by diamond-shaped nut and setscrew. Connect the three-way inlet.

9

After installation, turn on water to check if every thing is complete. Attention to cold water on the right and hot water on the left. The diagram shows water flow when the handles are turned on.

6

First connect the upper lift rod with the lower lift rod. Then insert the lift rod nut into the slot at the back of the faucet body to connect with the upper lift rod.

7

Use the connecting rod to connect the two inlet valve bodies and the three-way inlet. Tighten them with connecting nuts.

V. Maintenance

After a period of usage, if the volume lessens, it might be due to debris from bad quality water blocking the aerator. Use the S2 wrench to take out the M3 screw. Then take off the nozzle board, nozzles, and filter. Clean the filter with clean water. Then install all parts back.
